- Collaborating with stakeholders to define project goals and objectives.
- Analyzing and clarifying requirements to ensure they are clear and feasible.
- Ensuring the design meets performance, scalability and security criteria.
- Performing testing and fixing defects.
- Writing code for specific modules or features.

ADDITIONAL INFORMATION

I have been an active participant in a highly beneficial mentorship program during my university years. As a top-performing student, I have taken the initiative to support and guide my fellow classmates, both within my semester and those in lower semesters, to overcome academic challenges. This voluntary mentorship role involved assisting peers in understanding complex subjects, sharing study strategies, and fostering a positive learning environment. My dedication to helping others succeed and my commitment to giving back to the academic community have been truly rewarding experiences.
