SUMMARY

Software Engineer with experience building mobile, web, backend, and AI-assisted systems using Flutter, TypeScript, Python, SQL, and PostgreSQL. Built production features for payments, reservations, conversational workflows, and customer-facing applications, with hands-on experience in API integration, debugging cross-service issues, and end-to-end software delivery.

SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Dart, SQL, HTML, CSS
- **Frameworks & Technologies:** Flutter, React, Node.js, NestJS, Express, Prisma, Supabase, PostgreSQL
- **Core Areas:** Full-Stack Development, Mobile Development, REST APIs, Database Design, Debugging, Testing, AI Assistants
- **Tools & Practices:** Git, Docker, Linux, Agile/Scrum

EXPERIENCE

Software Engineer

June 2024 – Present

Merkuria

Remote

- Reduced failed payments by improving Stripe integration and resolving checkout workflow issues across Flutter and backend services, increasing transaction reliability for 3,000+ monthly users.
- Improved app performance and reduced UI bugs by refactoring Flutter state-management logic and resolving frontend-backend integration issues.
- Redesigned reservation flows and fixed data-sync issues across services, improving booking reliability and overall user experience.
- Built and refined AI assistant workflows by improving conversation handling, state transitions, and business-rule enforcement across multi-step customer support scenarios.
- Developed backend-driven logic and validations for AI assistants, supporting reliable workflow execution and production issue resolution in customer-facing interactions.
- Contributed to structured data and information-processing workflows using Python-based extraction and validation logic for business-oriented applications.
- Collaborated in Agile sprints, participating in code reviews, technical planning, testing, debugging, and production releases.

Software Engineer Intern

March 2024 – June 2024

Laboratorio de Software Libre Zacatecas

Remote

- Implemented frontend and backend improvements for internal applications, enhancing functionality and usability.
- Debugged API issues using logging, testing workflows, and step-by-step isolation techniques.
- Used Linux, Git, Docker, and scripting to support development pipelines.
- Collaborated with stakeholders to gather requirements and validate feature design.

PROJECTS

Conversational AI Assistant with Google ADK

2026

- Building a conversational AI assistant with Google ADK, supporting multi-turn interactions, personalized responses, and tool-driven workflow execution.
- Implemented structured tool calls to answer questions from product catalog and FAQ data sources during chat-based interactions.
- Designed memory-aware behavior to retain user-specific context, such as names and preferences, across conversations.

- Developed a testing interface to evaluate agent behavior, conversational flows, and end-to-end assistant interactions.

Suicide Risk Assessment App (Flutter & Supabase)

2024

- Built a Flutter app to evaluate suicide risk using validated questionnaires, supporting early-warning detection for university students.
- Implemented automated scoring and risk classification in Flutter, improving assessment accuracy.
- Created Supabase SQL views to aggregate questionnaire data and generate real-time summaries.

CASE University Questionnaire System (Flutter & Supabase)

2024

- Developed a Flutter application to collect and process university questionnaires, reducing manual workload.
- Implemented automatic statistical calculations to generate percentages, charts, and summaries instantly.
- Built Supabase SQL views to aggregate responses and provide real-time analytics.

EDUCATION

Universidad Autónoma de Zacatecas
B.S. in Software Engineering, Honors | GPA: 3.9

Zacatecas, México

Aug 2020 – Apr 2025

- **Relevant Coursework:** Algorithms, Data Structures, Database, Object-Oriented Programming, Software Programming, Web/Mobile Development, Container Architecture (Docker), User Interface Design, Testing, Software Quality Assurance

Centro de Estudios Tecnológicos Industrial y de Servicios 113
Technical Degree in Software

Zacatecas, México

HONORS

Graduated with Honors (Top of Cohort) | TOEFL: 643/677

2025
